The "**Buddies in the Caribbean**" DX group which specializes in low power and QRP radios and the Buddipole portable antenna system operated Dec 4 to Dec 11, 2011 from the West Indies island of St. Lucia (J6). Beach portable, pedestrian and bicycle mobile, backpack battery-only, and villa operations occurred on bands 160m thru 10m. There were several beach-portable operations. The team also participated in the ARRL 10m Contest as J68UN with over 1200 QSOs. Buddipole antennas were the main antenna type used on this DXpedition. Lightweight, versatile, and extremely effective, the Buddipole system has become a favorite of portable operators throughout the world.
